SUMMARY

I'm a web developer with 10+ years of experience creating customer-focused websites, web applications, and marketing response sites. Along with my extensive front-end knowledge, I've also had experience with designing site structure, working on teams with developers, designers, and vendors as needed. Liaising with other departments and/or company executives and handling several projects simultaneously.

SKILLS

Scripting language: HTML5, CSS/CSS3, JavaScript
Framework/Library: AngularJS, React, React Native, SASS, Bootstrap, jQuery
Cloud-based content management systems: Veeva, Skura
Others: Grunt, NPM, Bower, Yeoman, Git

EXPERIENCE

Digilock • Petaluma, CA (2016-present)
Full Stack Developer
Developed two redesigns of Digilock.com and Lockup.com. Both redesigns use Wordpress custom templates and utilize the JSON API with AngularJS. Digilock.com features translations for 12 languages.

EVEO - Healthcare Marketing • San Francisco, CA (2011-2016)
Senior Web/Mobile Developer
Developed interactive HTML5 content solutions for mobile applications and websites. Acted as tech lead on multiple projects, which included: providing production time estimates, technology consultation, and facilitating communication between engineers and others.

HIGHLIGHTS

- Developed AbbVie Prostate Cancer Counselor web application for health-care providers, patients, and their caregivers. Built using AngularJS and PhoneGap, allowing doctors to walk their patients through diagnosis and treatment. App also features tools to help personalize the facts for better patient understanding. www.prostatecancercounselor.com

- Developed a Jeopardy-like trivia game for Jazz Pharmaceuticals. This game was built using HTML5 and AngularJS. Features include a leaderboard screen and online and offline tracking. Leaderboard and tracking data are saved using Amazon Web Services.

- Worked on front-end team for ShoutMD.com. ShoutMD is the first professional, social commerce, network exclusively for board certified specialists, their staff, residents, and fellows. I worked on the media picker module which was the upload engine for images and videos. Shoutmd.com

- Multiple projects built to run on the Veeva and Skura content platform.

Loomis Group • San Francisco, CA (2010-2011)
Senior Interactive Developer
Interactive developer for many marketing campaigns and HTML emails.

HIGHLIGHT
- Developed redesign of Loomis Group's website and integrated Twitter feed and WordPress content component.

Nimblefish Technologies • San Francisco, CA (2005-2010)
Lead developer for all personalized websites and HTML emails using Nimblefish's JSP-based PURL platform.
Improved use of PURL-related technologies including JSP, CSS, and Adobe Flash/Flex. Guided production processes, managed freelancers, created standards for PURL/Email coding and PURL/Email QA, and developed Flash/CSS/XHTML techniques for PURL development. Clients included Nike, AT&T, LeapFrog, and Sears.

HIGHLIGHTS
- Nike Holiday Gift Guide personalized URL
- Nike Black Friday Factory Store program
- LeapFrog personalized URL and email
- Nimblefish website and internal marketing campaigns

EDUCATION
UC Berkeley Extension • San Francisco, CA (2001)
Center for Electronic Arts • San Francisco, CA (1995-1996)
AcademyX: Flex Fundamentals • San Francisco, CA (2009)
